

## A TASTEFUL EXPERIENCE

TAKE IN A SEA OF COLOURS AND DROP BY OUR FARM MARKET FILLED WITH LOCAL PRODUCE AND CRAFTS

Eurosa Gardens was founded in 1979, and expanded to include Eurosa Farms in 2005, creating over 125,000 ft<sup>2</sup> of greenhouse space. We are Vancouver

Island's only rose grower and ship our flowers all over BC. Our tours offer a unique behind the scenes experience rarely seen, consisting of four parts:

- ~ *Roses*
- ~ *Gerberas, Alstroemerias, and Snapdragons*
- ~ *Peppers, Tomatoes, and Cucumbers*
- ~ *Grading and Packaging*

Tours Last 45~60 mins.

## Farm Market

- ~Flowers

# Take the Tour

*Check out our Roses, Gerberas, Alstroemerias, Snapdragons, Peppers, Tomatoes, Cucumbers, as well as grading and packaging. Our team of experts will teach you the ins and outs of being a greenhouse grower.*

The tour is divided into four educational components covering all areas of the greenhouse involved in the day-to-day experience of producing flowers and vegetables. Tours will be divided into groups in each of these areas to provide an intimate learning environment with plenty of opportunity for questions and one on one interaction with our growers. These areas include all the products grown at Eurosa Farms: 1) Roses, 2) Gerberas, Alstroemerias, and Snapdragons 3) Peppers, Tomatoes, Cucumbers 4) Grading and Packaging.

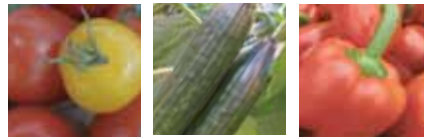

Visitors will be introduced to the beautiful rose varieties carried by Eurosa Gardens. The tour will include growing roses hydroponically, basic care and pruning, all designed to produce a beautiful single long stem rose. We will also share trade secrets for timing rose plants to produce specifically for high seasons such as Valentines Day. Guests will learn florist tips such as how to purchase the best product and how to care for your roses in your home for maximum life. Our grower will also offer tips for success with outdoor rose plants as well.

Camera happy folks will be greeted by our never-ending sea of color, the

perfect opportunity for a photo souvenir. Our grower will include methods for hydroponics and growing in the soil for the four different crops found in this section of the greenhouse. They will explain about seeding and replanting methods, plant turnover, as well as harvest methods for all varieties.

In this area we will also begin to explain biological pest control and give tips for other natural or organic pest control options that are easy to do from your home. We will also include as well tips shared from florists for care of your fresh cut flowers and what to look for when you are buying some of these products.

In the Pepper area of the greenhouse our grower will continue to

explain the subtle differences involved in growing hydrological as well as give a thorough explanation of biological pest control, and pollination required for pesticide free production of vegetables. Here our grower will tackle topics such as natural vs. organic, vegetative vs. generative as well as dispelling the myth about green peppers. They will discuss plant size, harvest methods, plant care, and pruning and lowering of plants. They will also discuss ripening agents used in long distance transportation and what to look for when buying fresh produce.

In the Grading area visitors will be invited to share in the experience of grading for quality, sorting, packaging as well as storage and shipping. They will be introduced to the equipment used as well as methods used to maintain freshness. Our flower designers will explain designing and producing beautiful flower bouquets. This area also contains a large info area showing the growth of Eurosa Farms over the years as well as other topics such as biological pest control and hydroponics as discussed in the tours.

# A Sea Of Colours

*Beautifying BC for over 25 years. Enjoy a kaleidoscope of over 125,000 ft<sup>2</sup> of floral colour! Eurosa tours take you behind the scenes — from award-winning roses to peppers to packaging. Eurosa is dedicated to giving you the ultimate tasteful experience.*

The tour will finish with complimentary refreshments including tea and coffee. We also offer a cozy Farm Market containing our products as well as other local crafts and treats such as soft serve ice cream.

Because we are a family run business, our tour times are very flexible. The greenhouses are open year round and the weather is always perfect inside.

## Other services

In our bistro area, delicious lunches can be organized for tours through Quattro Stagione Cafe, a truly yummy experience.

Bouquet arranging is also available after the tour. It takes approximately 30 minutes, depending on the group size, and you walk away with your own delightful bouquet.

We also offer bouquet making classes for smaller groups of people (12 max per hour). This is a much more in-depth class on bouquet making. Plan approximately one hour to an hour and a half. This is very successful during holidays such as Christmas, Valentines, Thanksgiving, Mothers Day and Easter.

**OPEN MONDAY-SATURDAY**  
**9:00AM – 5:00PM**
